

Prototype 2 (connected to Storyboard 2)

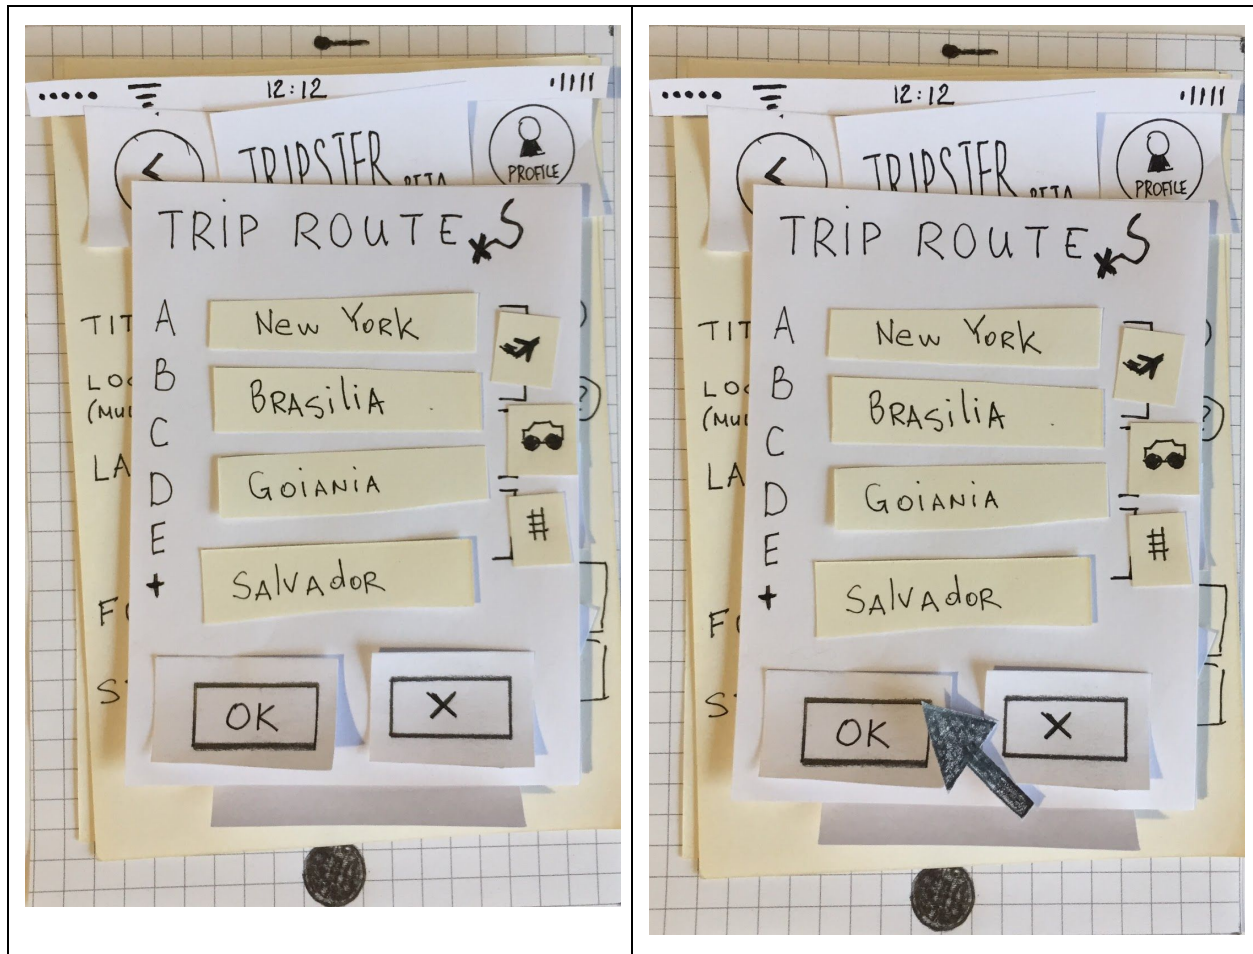

Creating Page in Gallery while on vacation

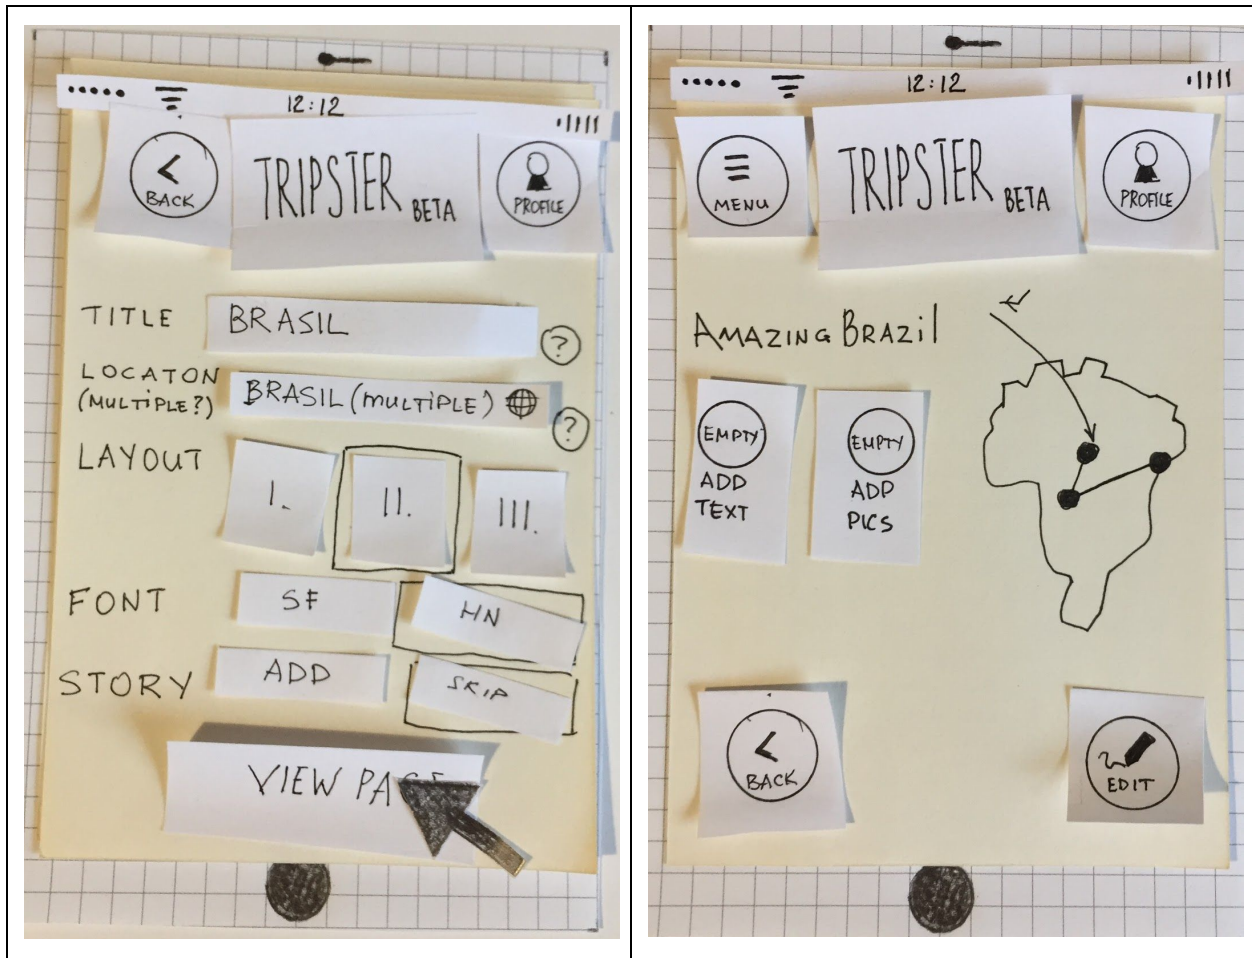

Point of View: Making bunch of pictures while on vacation might be nice, but storing and forgetting about them make things only worse. Reviving good photos may be fun and satisfying experience. As well as post whole photo album while traveling.

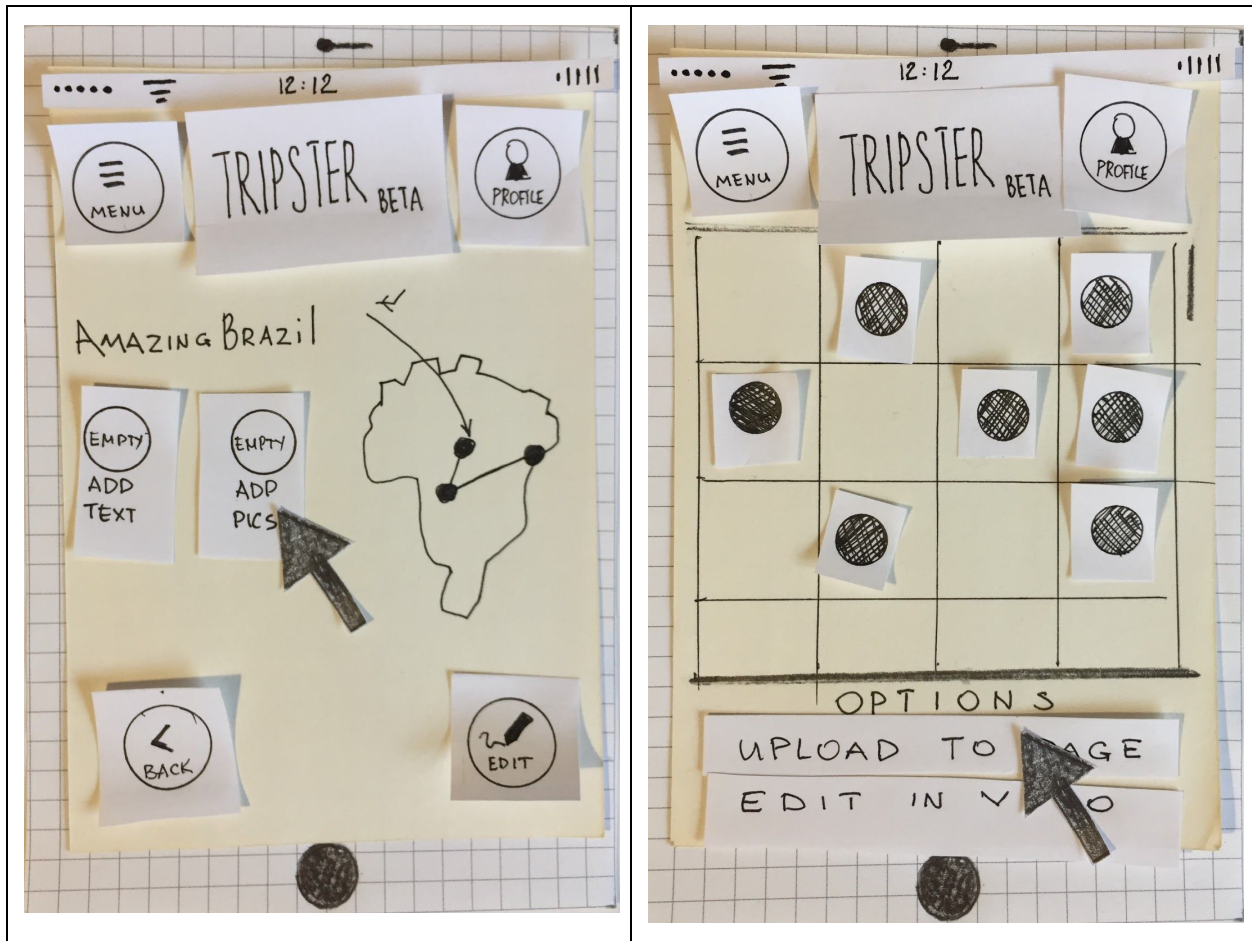

Entering information to create new Page, and choosing multiple trip locations

Creating route map point by point

Generating page and seeing the result

Choosing to add some content, this time – pictures, but we also can add some text
Selecting pictures in Camera Roll

Uploading pictures and choosing to delete them from phone after process is finished
